

Stibo ProductGen AI

Transforming Product Content with Advanced AI

Stibo ProductGen AI speeds up and improves your product content operations. An extensible library of use cases works in batch mode to pinpoint anomalies, create new content, check data cohesion, translate, and much more. The solution leverages your preferred Large Language Models (LLMs) to extract, validate, enhance, and generate high-quality product data seamlessly from within Stibo STEP.

Discover the Power of AI-Driven Content Management

Stibo ProductGen AI

Deployable on existing product sets and/or item data onboarding workflows.

Product Content Intelligence

Library of AI use cases that transforms and validates product data.

On-going AI Support

Monitors AI response to ensure AI services are running optimally.

Unlock the Benefits

1

Accelerate Time-to-Market

Reduce manual effort and speed up product launches with AI-powered automation.

2

Improve Data Quality

Maintain high standards of accuracy and consistency across your product data.

3

Enhance Customer Experience

Deliver richer, more engaging product content that drives conversions.

4

Flexible & Scalable

Easily add new use cases as your business grows and adapts to changing market demands.
